

# The Hidden Vale Wildlife Project

Exciting opportunities exist for students and researchers to be part of next-generation research at the **Hidden Vale Wildlife Centre**.

Set amongst a 4,000 ha nature refuge of diverse ecosystems, grazing and ecotourism, the Centre is a world-class wildlife breeding and research facility, developing innovative and globally significant solutions for wildlife management and conservation.

A wide range of projects, including Honours, Masters and PhD, are available within research themes of:

- Population biology
- Pest management
- Ecosystem dynamics
- Habitat condition and connectivity
- Sustainable land management
- Threatened species breeding and reintroductions
- New technologies for captive wildlife management and post-release strategies
- Wildlife rehabilitation and release
- Ecotourism
